VALDARNO

Newsletter

Valdarno's new challenge.

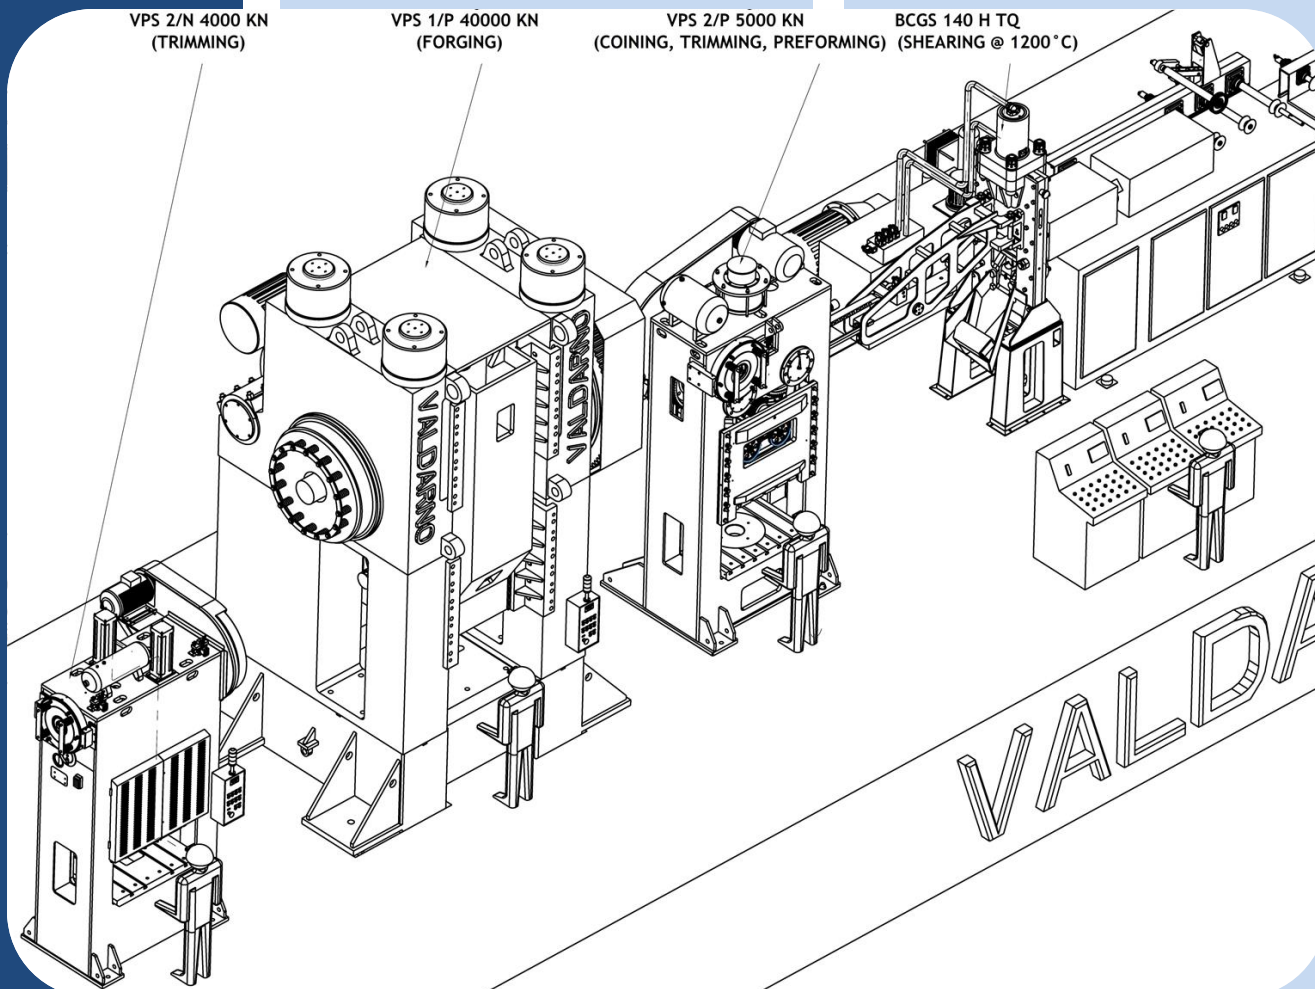

Besides exhibiting at the forthcoming EMO 2015, occurring this year in Milano, nearby the EXPO 2015 premises, between October the 5th and the 10th, Valdarno decides to challenge the Asian Market, by exhibiting at the forthcoming Metalform 2015, in Shanghai, between September the 16th and the 19th, as well.

We'll be pleased to meet all our domestic and international customers on both sites.

See you soon!

Kindest regards.

Forging solutions since 1949

Established in 1949, VALDARNO develops, designs, builds and supplies machines, equipment and lines mainly for the close die forging industry.

During many years of close and daily contact with companies and industry operators, in Italy and abroad, VALDARNO has acquired knowledge and competences which enable its specialists and engineers to study, realize and propose manufacturing solutions expressively designed for specific fields, such as, for example, the production of leaf springs, spiral springs, high resistance bolts, motor valves, tube fittings by hydro forming.
